

Design Principles

1. Start with user needs.
2. Design for everyone.
3. Do the hard work to make it simple.
4. Design with evidence.
5. Be consistent.
6. Give choice and control.
7. Consider the context.
8. Iterate, then iterate again.
9. Make things open, it makes them better.
10. Maximum provision for safety & privacy.
